Odds-API.io public sample

Decision memo / Evidence checked 19 November 2026

Can we use this file to test a strategy against past results?

> Use the file to test how prices join to fixtures. Before using the final scores to grade a strategy, reconcile them with official results.

Passed

Sample file integrity

All 51,866 closing-price rows matched one of 2,123 distinct fixtures. Every fixture had a price row. The sample covers 11 sportsbooks across the Premier League, NBA and NHL.

Discrepancy

Final score in the public sample

Fixture 61301245 shows 1-1. The Premier League records a 0-1 Arsenal win. This finding concerns the dated sample file.

The test used West Ham United v Arsenal on 10 May 2026.

Scope of the evidence

Six public checks passed. In addition to file integrity, they covered operator identity, published prices, data-use terms, public API catalogues and the MCP release inventory. The score comparison covered the named fixture. Vultax Research funded the public checks.
